

**WE'RE
SORRY**

SORRY FOR ANY INCONVENIENCE

We are always concerned about inconveniencing people. This is why we are warning you about possible traffic disruptions in this area, including disruptions to bus services, from October 7 onwards.

Why is this disruption necessary?

We are in a climate and ecological emergency.

Last year the United Nations warned that human survival depends on “rapid, far-reaching and unprecedented change in all aspects of society”.

This means, for the human race to survive, we need big changes fast. There are solutions that are economically and

culturally possible in a short space of time. But we need the government to start the changes now, and they are not listening.

We need to act now. Nonviolent direct action is the only morally acceptable tool we have left to make the government change course. This really is our last chance. ***It's a matter of life or death.***
